

Professional Summary

Python Developer with 6 years of experience in building **scalable applications, and data processing systems**. across enterprise environments. Strong expertise in **Python, Flask, Django, Pandas, and Selenium**, with hands-on experience in developing **Fast APIs, pipelines, and data-driven applications**. Proven ability to write clean, maintainable code following best practices, perform code reviews, and optimize performance. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.

Core Technical Skills

Programming & Scripting

- Python, JavaScript, FastAPI, Flask, Django

Automation & Tools

- Selenium, Flask, customtkinter
- Jenkins, Docker, GitHub, AWS

Data & Databases

- Pandas, NumPy, scikit-learn
- SQL, MongoDB, SQLite3
- openpyxl, xlswriter, pandas
- LangChain, LangGraph

Systems & Networking

- Linux, Windows
- Networking Basics, Protocols

Professional Experience

Process Associate/Python Developer–CMT (May 2024 – Apr 2026)
Amazon | Bangalore, KA

- Develop backend systems, scripts, APIs and data-processing pipelines
- Write optimized SQL queries and integrate Python with databases (MySQL, SQLite3)
- Handle authentication, request validation, and error handling
- Deploy applications and monitor performance in production environments

Catalog Associate/Python Developer–RBS (May 2021 – May 2024)
Amazon | Chennai, TN

- Analyze existing workflows, SOPs, and recurring manual tasks
- Build tools using Python, SQL and internal Amazon tools
- Create scripts, dashboards, trackers, bots, or web applications
- Validate logic to prevent incorrect data processing
- Continuously improving tools based on performance and user feedback

Apprentice – Line Supervisor (Jan 2020 – Dec 2020)

Metalman Auto Pvt. Ltd. | Hosur, TN

- Supervised daily production line operations and workforce
- Ensured adherence to quality standards and SOPs
- Reduced defects through process monitoring and corrective actions

Applications, Projects & ML

Misclassified ASIN Detection Model

- Developed a machine learning model to detect misclassified ASINs using attribute-based pattern analysis
- Improved classification accuracy and reduced manual auditing effort by automating anomaly detection
- **Tech:** Python, scikit-learn, Pandas, NumPy, Langchain, LangGraph

Selection Central Suite

- Designed a centralized platform integrating multiple operational tools
- Automated contribution removal, data extraction/upload, and size segregation workflows
- Streamlined operations through a unified interface
- **Tech:** Python, Selenium, Pandas, CustomTkinter

CSI Extractor

- Built a web tool to extract structured data from internal portals
- Enabled efficient data collection and downstream processing
- **Tech:** Python, Selenium, FastAPI, Pandas

Education

Gandhi Institute of Engineering and Technology

Gunupur, Odisha

B.Tech Mechanical Engineering

CGPA: 7.86 | 2016 – 2020

Jawahar Navodaya Vidyalaya

Panikoli, Odisha

Matriculation

8.6 CGPA | 2012 – 2014

Intermediate

78% | 2014 – 2016

Awards & Recognition

- Problem Solver Pin – Operations Manager (RBS)
- Deliver Results, Invent & Simplify, Ownership Pin
- An Extra Mile Award – Q2-2022, Q4-2023, Q2-2024
- Beyond and Above Award – Q3-2022, Q4-2023
- Sensei Award – Mentorship & New Hire Training Excellence
- Switch the Gear Award – Rapid upskilling and tech innovation

Personal Projects

Self-Hosted NAS

- Built and configured a Network Attached Storage (NAS) system for centralized data storage and access

- **Tech:** Python, Flask

Personal Movie Streaming Platform

- Set up a personal media streaming platform for organizing and streaming movies

- **Tech:** Python, Flask

System Monitoring Dashboard

- Real-time system monitoring dashboard to track CPU, memory, disk, and network usage for server

- **Tech:** Python, Flask

Redrive Engine

- Implemented an automated task redrive system with scheduling and email notifications
- Reduced manual monitoring and improved operational reliability
- **Tech:** Python, SMTP, Scheduling

Productivity & Shrinkage Tracker (RBS & CMT)

- Developed a web-based application to track productivity and shrinkage metrics
- Automated reporting and notifications, generating team-level insights for stakeholders
- Maintained historical associate mapping for accurate tracking
- **Tech:** Django, JavaScript, Pandas, SQLite3

CSI Normalization Validator

- Developed a validation engine to ensure data consistency and detect missing values
- Improved data quality and reduced manual validation effort
- **Tech:** Python, Pandas, FastAPI
